

RURAL WATERLINE EXTENSION ARE YOU IN?

In early 2019, a survey was sent out by GD Newton & Associates to gauge the interest of pursuing an extension of the Rivers Utility into the rural areas of the municipality. Of the 392 recipients, 69 responded with positive interest, 53 were not interested, 2 were undecided and 268 did not respond.

Based on those survey results, cost estimates were compiled in a report submitted by GD Newton. This report is available on our website at www.riversdaly.ca

In December 2019, the municipality held an open house to discuss the future of the rural waterline extension proposal. It was determined that a connection fee of \$15,000 – \$20,000 would be assessed on each participating property. This fee would only apply to those properties connecting to the line at the time of initial install.

To move forward with funding applications, we are asking for property owners to confirm their interest in connecting to a municipal waterline no later than January 31st, 2020. It is our hope to begin the process of applying for government funding in early 2020.

What does this mean for me?

Riverdale Municipality has spent the last year looking into the feasibility of extending the Rivers Utility Waterline out to the rural areas of the Municipality.

What will it cost me to get connected?

A one-time fee of \$15,000 - \$20,000 per connection. Fees could be paid in a lump sum, or be added to property taxes and recovered over a set period of time with a fixed interest rate (ie 10 years)

What if it's more than \$20,000?

During our study, we have determined that any cost over \$20,000 would result in a significant drop in interest and the project would not move forward.

What if I want to connect at a later date?

Undetermined at this time, but could possibly be in the \$25,000 - 30,000 range.

What if I sell?

** Full Fees would be due and payable should land ownership change.

Please visit the Municipal Office, or our website to review the report in its entirety.

Property Owner Name: _____

Legal Land Description: _____

I am Interested

I am NOT Interested

I understand that this is not a legally binding confirmation of my participation/connection to the Rivers Utility water line extension into the rural.

I understand that should the cost of a connection exceed \$20,000 per connection, the project will not move forward.
