Rivers Dam Rehabilitation Update

The Rivers Dam construction will continue into the fall and winter months of 2024 (to ensure the spillway is fully operational during the spring and summer). This work includes raising the existing earthen dam embankment by approx. .6 m to provide additional freeboard for the inflow design flood, increasing the capacity of the spillway by raising the existing upstream wingwalls and spillway chute walls, raising the stilling basin walls and increasing the length and thickness of the basin floor, installing new drainage systems, safety boom, and anchoring of the spillway crest. A full report can be found on our website. Construction work is projected to be complete in June 2026.

For a full detailed report visit: www.riversdaly.ca

Mark your calendars! November 22 Santa will be coming to Riverdale!
